SUMMARY

Full Stack Web Developer with experience in building scalable web applications using React.js, Node.js, Express.js and MongoDB. Skilled in developing real-time applications, REST APIs, and AI-powered features. Passionate about building efficient and user-focused software solutions.

EDUCATION

- Sri Guru Teg Bahadur Khalsa College** Sri Anandpur Sahib, India
Bachelor of Computer Application: CGPA: 8.17 (Aggregate) 2023 - 2026 (Pursuing)
- St. Carmel School** Rupnagar, India
12th Grade (Non-Medical) Percentage: 72.4% 2022 - 2023
10th Grade Percentage: 84.6% 2020 - 2021

SKILLS

- Languages:** HTML, CSS / SCSS , JavaScript
- Frameworks/Libraries :** React.js, Node.js , Express.js, Tailwind CSS
- Database:** MongoDB
- Tools:** Git, GitHub, Postman, VS Code, MongoDB compass

EXPERIENCE

- Internship:** Successfully completed 2 months Internship program on Web Development from September to October 2024 from Skill Dunia in association with Odcet Technologies.

PROJECTS

- AI-Powered Social Media Backend** | Node.js, Express.js, MongoDB, ImageKit, JWT, Gemini API :
Developed the backend of an AI-powered social media application where users can upload images and automatically generate captions using AI. Implemented user authentication with JWT, including secure login and registration using an auth controller and authentication middleware. Integrated ImageKit for image storage and delivery, and stored image data along with AI-generated captions in MongoDB using scalable APIs built with Node.js and Express.js.
- Real-Time AI Chatbot** | Node.js, Socket.IO, Gemini API :
Developed a real-time AI chatbot using Socket.IO to enable bi-directional communication between client and server. Implemented persistent connections for instant messaging and low-latency responses. Integrated Gemini 2.5 Flash AI model to generate intelligent chatbot responses, improving interaction speed and user experience.
- Moody Player** | Node.js, Express.js, MongoDB, React.js, ImageKit :
Developed a web application that detects a user's mood using real-time facial expression analysis and recommends songs accordingly. The system accesses the user's camera and uses Face API to identify emotions such as happy, sad, angry, surprised, and neutral. Implemented backend logic for mood-to-song mapping and efficient song retrieval using MongoDB, with audio files managed through ImageKit cloud storage.
- Recipe Manager Website** | React, Tailwind CSS, Local Storage, and CRUD operations :
Developed a responsive web application to solve the problem of maintaining recipes on paper. Users can store recipes digitally, making them easier to manage, update, access and delete while preventing loss of notes and reducing paper usage.

ACADEMIC ACHIVEMENTS AND AWARDS

- 1ST Position in Web Development:** Designing an Home Page within 2 hours
- 1st Position in Model Making:** Recipe Manager website
- Web Development Fundamentals | IBM Certificate**

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
